**CORPORATE UNITED ANNOUNCES MATERIAL HANDLING
MANAGEMENT AGREEMENT WITH TOTAL FLEET SOLUTIONS**

CLEVELAND – July 22, 2009 – Corporate United, the nation’s largest group purchasing organization (GPO), enters a new three-year contract with Total Fleet Solutions (TFS). TFS is a brand-independent fleet management company, specializing in forklifts and allied equipment that manages over 20,000 assets for its customers in North America.

Corporate United’s agreement with TFS became effective April 20, 2009 and is available to the GPO's more than 140 member companies. The agreement provides members with all services needed to manage a material handling fleet, including the mechanical equipment used in the movement, storage and control of materials throughout manufacturing and distribution processes. This includes, but is not limited to: forklifts, pallet jacks, order pickers, forklift attachments, and batteries and chargers.

“A steering committee comprised of 11 Corporate United member companies worked together to select TFS for a cost savings program that focuses on the total cost of owning and operating material handling equipment,” says Marc Rosen, Corporate United president. “Due to the diversity of programs, requirements and original equipment manufacturers of each member company on the committee, we are confident the agreement is comprehensive and will meet the needs of our membership.”

-more-

Corporate United Members receive the following benefits when they participate in the TFS material handling management agreement:

- Flexible program applies regardless of equipment manufacturer
- Discounted labor rates for on- or off-site maintenance
- Aggressive discount on maintenance parts
- Group volume incentive rebate
- Industry expertise and leverage for negotiation of purchases, leases or rentals
- Review, audit and processing of invoices for maintenance and leases; consolidated invoice to customer
- Monitoring technology tools to assist in abuse prevention, safety compliance, driver accountability, green initiatives and productivity
- All material handling assets and associated costs tracked in centralized database and available for reporting online
- Warranty management and dispute resolution to ensure utilization of warranty coverage
- Comprehensive site survey and analysis of cost and performance, along with recommendations for improvement
- Fleet right-sizing, including: disposal, rotation, and refinancing of under-utilized assets, as well as cost justification replacement analysis
- Implementation and management of maintenance plans and associated work order processing
- Management of end-of-lease process, including administration, notification, returns and remarketing as appropriate
- 24/7 support without incurring the fixed costs associated with internal resources
